The Communist Brute is the embodiment of all the worst aspects of the Soviet Union: violent, uncompromising, ruthless, hateful, deceitful, paranoid, and determined to destroy the decadent capitalist superheroes. It may be a Cold War, but to the Communist Brute it's just war, plain and simple. Like a metal juggernaut in his cold-steel powered armor—the cutting edge of Soviet technology—his aim is to crush all opposition. The only limit is put upon him by the Kremlin: the world must behold his triumphs, so it can see not even America's superheroes can stand before Soviet might.
